

## REFERENCE BLOCK MTU N° 3 ACCORDING TO SPECIFICATION REF.T11350010AC

The MTU N°3 answers to the following question: What is the quality of the magnetic ink (new or being used)

### HOW TO USE IT:

- Remove the grease on the part using the grease remover. Check there is no indications (under intense UV light and little white light ambiance if fluorescents comparators are used)
- If you want to check a black product, you must apply a thin layer of white contrast first. If it is a fluorescent part, the white contrast is not needed.
- Apply the product to be controlled by watering or spraying it during 3 to 4 seconds without magnetising the magnet which is pre-magnetised.
- Examin under white light or UV light depending on the part type used.
- Remove grease after use
